CAREER OBJECTIVE

Throughout my time as a software developer, I have focused on developing code while following best practices and expanding my tech-stack to meet new challenges. I enjoy working collaboratively but am comfortable to handle projects on my own. I look forward to joining a company that is product-driven and promotes my growth as a developer.

WORK EXPERIENCE

Java/React Developer

Infosys

📅 November 2022 - current

📍 Remote

- Attained in-house Lex certification relating to Java and Spring Boot
- Received training in Spring Cloud Microservices, implementing configuration servers, service discovery, resilience patterns, and API gateways.
- Created a web app MVP for a employee management system, enabling the creation and management of employee records using Java and React

Software Developer

Revature

📅 April 2022 - November 2022

📍 Remote

- Added new features to E-Commerce web app to enable account creation and sign-in, dynamically rendering, adding, removing, and altering quantity of cart items, and listing new items for sale for admin accounts.
- Acted as Team Lead on a third-party API web app involving: monitoring/managing deliverables, contributing to code-base, and directing team on new technologies.
- Mentored 3 developers on Java and OOP principles, resulting in improved comprehension of language fundamentals and project completion within strict time frame

EDUCATION

Bachelor of Science

Computer Science

Colorado Technical University

📅 2018 - 2022

📍 Aurora, CO

🎓 GPA: 3.7/4.0
